

# MANEESHA P.C.

Bengaluru, Karnataka, India | [maneesha242424@gmail.com](mailto:maneesha242424@gmail.com) | [LinkedIn](#) | [GitHub](#)

## PROFESSIONAL SUMMARY

Computer Science postgraduate with a strong interest in design, user experience, web applications and requirements analysis. Possess a solid foundation in software development with hands-on experience in developing and deploying applications. Have additional exposure to Artificial Intelligence, Cybersecurity and Data Analytics. Strong analytical and problem-solving abilities, with an eagerness to learn, adapt to new technologies, understand requirements and contribute effectively in diverse technical environments.

## SKILLS

**Technical:** UI/UX Design, Web Design & Development, Requirements Analysis, Wireframing & Prototyping, Computer Science Fundamentals, Prompt Engineering

**Other Exposure:** Artificial Intelligence, Cybersecurity, Cloud & Deployment Technologies, Data Analytics

**Soft Skills:** Analytical Thinking, Problem Solving, Communication, Collaboration, Adaptability, Continuous Learning, Creativity, Attention to Detail

## PROJECTS

**MyTask Space** - *Personal Productivity Application* - [link](#)

- Designed and developed a productivity application focused on organizing everyday tasks and activities.
- Planned and implemented features for task management, planning, notes and document export.
- Focused on usability, organized information and secure access to user data.
- Deployed the application for real-world use, gaining experience across the software development process.

**RoutineSync** - *AI-Powered Task & Routine Planner* - [link](#)

- Designed a task and routine management application to help users organize and understand their daily activities.
- Developed interactive views and visual summaries to make task progress easier to understand.
- Integrated an intelligent assistant to provide personalized feedback based on user activity.
- Focused on creating a simple, interactive experience while combining automation and data-driven insights.

**EmailShield** - *Email Threat Detection System* - [link](#)

- Developed a system to identify and categorize potentially harmful and unwanted emails.
- Analysed email content and related information to distinguish between different types of threats.
- Focused on making results understandable and useful for users reviewing suspicious messages.
- Built an interactive application to demonstrate the system and support real-time analysis.

## INTERNSHIP EXPERIENCE

**Java Intern** — *Slash Mark IT Solutions (OPC) Pvt. Ltd.*

Oct 2024 – Nov 2024

- Developed application modules and gained practical experience in software development.
- Worked through software development processes and collaborated using version control.
- Strengthened understanding of programming, application development, and structured development practices.

**IoT Intern** — *Strydo Technologies*

Nov 2023 – Dec 2023

- Studied connected-system architecture, device interaction and communication processes.
- Developed an understanding of how software interacts with hardware and connected systems.
- Strengthened independent learning, research and technical problem-solving skills.

## EDUCATION

**Master of Technology (M.Tech), Computer Science & Engineering — AI/ML Specialization** 2025 – 2027

Dayananda Sagar University, Bengaluru.

CGPA: 8.77 / 10

**Bachelor of Technology (B.Tech),**

**Computer Science & Engineering — IoT & Cybersecurity including Blockchain**

2021 – 2025

Siddharth Institute of Engineering & Technology, Puttur

CGPA: 8.45 / 10
